Satish Nepali
Flutter & Android (Kotlin) Developer

Vaasa, 65230, Finland | +3580449513523 | satishnepali79@gmail.com | Protfolio Wesbite

Profiles	satish-nep79	satish-nepali

Summary

Flutter and Android (Kotlin) developer with experience building production-ready mobile applications, SDKs, and secure payment integrations. Strong background in end-to-end development, REST APIs, Firebase, and UI/UX collaboration. Currently pursuing an MSc in AI & Data Engineering at the University of Vaasa and available for part-time roles (15–25 hrs/week).

Experience

Code Himalaya — April 2024 – July 2025
Flutter Developer — Lalitpur, Nepal
Website

- Developed and maintained Flutter applications with a focus on performance, scalability, and clean UI.
- Collaborated with designers and backend teams to deliver user-centric mobile solutions.
- Integrated REST APIs and Firebase services for real-time data handling.

UPTRENDLY — January 2025 – June 2025
UI/UX Designer (Contract) — Kathmandu, Nepal
Website

- Designed modern and intuitive UI/UX for mobile app features.
- Collaborated with cross-functional teams and incorporated user feedback into design iterations.
- Improved user engagement and satisfaction by approximately 25%.

HiSAVE — February 2025 – May 2025
Flutter Developer (Contract) — Remote (India)
Website

- Implemented and optimized key Flutter app functionalities.
- Led push notification setup to improve user engagement.
- Integrated deep linking and improved onboarding flows.

IvyGo — September 2024 – October 2024
Flutter Developer (Contract) — Remote (Australia)
Website

- Integrated Stripe payment flows into a Flutter application.
- Ensured secure and seamless payment transactions.
- Collaborated remotely with an international development team.

Skybase Innovations — November 2021 – January 2024
Mobile Application Developer — Pokhara, Nepal
Website

- Led end-to-end development of mobile applications using Flutter and Kotlin.
- Integrated REST APIs, Firebase, push notifications, ads, and Google Maps.
- Improved app performance and UI responsiveness through debugging and optimization.

Sasto Tickets — March 2022 – November 2023
Mobile App Developer (Kotlin / Flutter) — Remote (Kathmandu, Nepal)
Website

- Designed and developed a reusable Android SDK using Kotlin for flight booking.
- Built Flutter applications integrating real-time flight data and payment gateways.
- Collaborated with partner teams for SDK integration and versioning.
- Created technical documentation and worked with the Viber team on bot integration.

Projects

Sasto Tickets Platform — 2022 – 2023
Flight Booking SDK, Mobile App & Viber Bot

- Developed multiple components of the Sasto Tickets platform, including a reusable Android SDK, a cross-platform Flutter flight booking application, and a Viber bot for automated user interactions.
- Built a **Kotlin-based Android SDK** enabling real-time flight booking via REST APIs, designed for easy integration by partner applications.
- Developed a **Flutter flight booking app** with real-time flight data, booking flows, and payment gateway integration.
- Created a **Viber bot using Node.js** to support automated booking-related interactions and notifications.

  Technologies: Kotlin, Android SDK, Flutter, Dart, Node.js, REST APIs

Kotlin, Android SDK, Rest API, Node JS, Flutter, Viber API

Saral Shikshya — April 2024 – July 2024
Exam Preparation Platform
App Link

Built a mobile exam preparation platform with mock tests, real-time exams, and performance analytics.

Technologies: Flutter, Dart, Firebase, GetX

Flutter, Firebase, Get X

Bhoklayo
Food Delivery & Restaurant Management System

- Developed a Flutter-based food delivery app and web ordering system with QR-based table ordering.

  Technologies: Flutter, Dart, Google Maps, REST APIs

Flutter, Dart, Google Map, Rest APIs, Firebase

Hitech
B2B Ecommerce Application

Built a B2B ecommerce application with product filtering, cart management, and order tracking.

Technologies: Flutter, Dart, Firebase, Riverpod, REST APIs

Education

University of Vaasa — August 2025 – July 2027
AI & Data Engineering — Master of Science
Website

Focused on artificial intelligence, data engineering, and applied machine learning.

London Metropolitan University — September 2019 – September 2022
Information Technology — Bachelor's Degree
Website

Studied software development, databases, and mobile application development

Skills

Programming Languages
Kotlin, Dart, Javascript, Typescript, Python

Mobile & Frameworks
Flutter, Android SDK, Firebase

Tools & Concepts
REST APIs, Git, Payment Integration, Push Notifications, GitHub, GitLab

Web Development
React JS, Node JS

Languages

Nepali
Native

English
Proficient (C2)

Finnish
Basic (A2 and learning)
